

ERROR-REPORT

Thorsten Hodes – 7-PDF, Germany • In der Röd 5 • D-36132 Eiterfeld - GERMANY

Dear User,

an error occurs while creating the WebPDF for your given URL.

This could be happen for some of the following reasons:

1. You would like to convert a internal URL inside you LAN.

This is not possible, only public websites like **<http://www.google.com>** could be converted to PDF. If you are looking for a “internal” Website-to-PDF solution please contact us, we will send you some interesting offers for that!

2. You would like to convert directly a file, for example: <http://www.7-pdf.de/7pdf-icon.gif>

This is not possible, only hole website urls can be converted to PDF.

If you have further questions or problems, let us know!
Our free email support address is: hodes-software@gmx.de

Cheers,
- Thorsten Hodes
